## EQUIPMENT MAINTAINANCE

Equipment Maintenance plays a major role in the management and efficiency of the hospital in delivering quality health care to the patients. Equipment maintenance involves a set of activities conducted to keep equipments in optimum working condition and consists of periodic inspection, preventive & corrective maintenance. The overall functional status of Equipment is 96%

## HUMAN RESOURCE MANAGEMENT

Successful provision of quality services in healthcare depends not on the equipped unit but on the availability of round-the-clock clinical expertise, backed up by monitoring devices and equipment. Well-trained nurses and medical staff form the backbone of the service. Thus, the unit should have the required number of appropriately trained and qualified nurses.
